

Grontmij Capital Consultants

Real Estate and infrastructure are long term capital intensive investments. To manage these investments successfully, a solid financial plan that addresses the financial risks is essential, because these investments are unique, local and have many stakeholders. Grontmij helps investors and banks to be in control.

Grontmij gives advice to pension funds and other institutional investors about their real estate and infrastructure investments. Our advice can be about the investment Policy, implementation of the investment policy and the monitoring. In our advice we integrate return, risk and sustainability. All advice can be externally audited.

Grontmij Capital Consultants

Grontmij Capital Consultants integrates knowledge about local markets, asset specific expertise with financial expertise to give a tailor made advice. Our advice is always based on knowledge that is structured in our databases. Our customers can be in control about their real estate and infrastructure investments.
